

Stories of the Tweed Valley

Home Life

Making do

Dot Lange remembers 4-gallon kerosene tins being cleaned and recycled into portable kitchen sinks.

A gallon is a unit of measurement from the old imperial system of weights and measures, which originated in Britain. 1 gallon is equal to 3.785 litres. Australia changed from the imperial to the metric system in 1970.

Work out how many millilitres and litres there are in 4 gallons.

Answer:

Tweed River Regional Museum

Established in 2004, with the uniting of the three local Historical Societies, Tweed River Regional Museum is one museum in three special locations, Tweed Heads, Murwillumbah and Uki. Spanning the Shire from the coast to the mountains, the branches of Tweed River Regional Museum are a unique journey into the history, people and places of majestic Tweed Valley.
