Areas predicted to be inundated in AR1 200 year flood
(Incorporating Climate Change)

Flood level contour

(Metres AHD)

**DISCLAIMER:**

This map is based on the predictions of the "Tweed Valley Flood Study (update 2009)" and "Coastal Creeks Flood Study 2009". The predicted inundated areas apply to areas within the Model Boundary of the study. The information on the map may not be used for flooding and does not apply to local elimination or uncontrolled flooding. The representation of inundation area is based on median flooding level at the time of preparation. Conditions may have changed since that time. The extent of flooding the individual properties can only be estimated by a licensed surveyor. This map has been prepared using the best available data, computer modelling and mapping techniques. However, the accuracy of the map and data is not absolute and reflects only the accuracy of the data and the techniques used. Tweed Shire Council do not warrant that the map is definitive nor free from error and do not accept liability for any loss caused or arising from reliance upon information provided herein.
