Flood level contour
(Metres AHD)

Areas predicted to be inundated in
ARI 100 year flood
(Incorporating Climate Change)

Inundated area regions (flood levels, metres AHD)

- 5.5 to 3.0
- 3.0 to 3.5
- 3.5 to 4.0
- 4.0 to 4.5
- 4.5 to 5.0
- 5.0 to 5.5
- 5.5 to 6.0
- 6.0 to 6.5
- 6.5 to 7.0
- 7.0 to 7.5
- 7.5 to 8.0
- 8.0 to 8.5
- 8.5 to 9.0
- 9.0 to 9.5
- > 9.5

Provable maximum flood (PMF)

Additional areas inundated by PMF

DENOMINATORS
This map is based on the predictions of the Tweed Valley Flood Study (update 2009).

The practical inundated areas only apply to areas within the Main Boundary of the study.

Inundation levels are based on peak flood levels for each hazard, the areas and are subject to flooding. The map applies to river flooding only and does not apply to local drainage or combined flooding. The approximate extent of local flooding has been based on survey data available at the time of preparation. Conditions may have changed since that time. The extent of flooding for individual properties may be determined by a licensed surveyor. The map has been prepared using the best available data and techniques. Tweed Shire Council accepts no liability for any loss caused or arising from reliance upon information provided herein.
