DISCLAIMER:
This map is based on the prediction of the "Tweed Valley Flood Study (update 2007)" prepared by South East Queensland Water (SEQWa). The projected inundated areas only apply to areas within the Model Boundary of the study. The modelled extent of flooding has been based on survey data available at the time of preparation. Conditions may have changed since that time. The extent of flooding for individual properties can only be determined by a licensed surveyor. This map has been prepared by Tweed Shire Council for the purpose of identifying land areas that may be subject to flooding. Tweed Shire Council does not accept liability for any loss caused or arising from reliance upon information provided herein.

Probable maximum flood (PMF)
Areas predicted to be inundated in
ARI 100 year flood
Inundated area regions (flood levels, metres AHD)
5.5 to 6.0
6.0 to 6.5
6.5 to 7.0
7.0 to 7.5
7.5 to 8.0
8.0 to 8.5
8.5 to 9.0
9.0 to 9.5
> 9.5

Additional areas inundated by PMF

Flood level contour
(Metres AHD)
